

THE VORTECH PLATE

Vortech distribution technologies are revolutionizing the water treatment industry. The design creates fluidity of the media bed and extends contaminant removal capacity; which means less regenerations and significant reduction of water use, saving water, salt/potassium, with backwash flow rate reductions of at least 30%.

Vortech Distribution systems utilize a more efficient distributor plate design to reduce backwash and improve system efficiency compared to traditional cone & gravel systems. This unique design provides greater “lift” and “action” throughout the entire width of the mineral tank during a backwash cycle, whereas traditional cone and gravel systems channel up through the media causing areas of very limited movement.

VESTA WHOLE HOUSE 5 STAGE WATER SYSTEM

1st Stage REFINER

In this stage untreated water passes through superior Premium Coconut Shell Carbon media.

2nd Stage SOFTENER

Water passes through superior Ion Plus CA-10 Resin for increased efficiency and performance enhancement.

3rd Stage CLARIFIER

This removes all cloudiness resulting in crystal clear water.

4th Stage CONTROLLER

KDF-55 Removes Bacteria, algae, and heavy metals from the water.

5th Stage POLISHER

Water is filtered through a high quality quartz media to polish the water, providing the best quality water.

VESTA WHOLE HOUSE 4 STAGE WATER SYSTEM

1st Stage REFINER

In this stage untreated water passes through superior Premium Coconut Shell Carbon media.

2nd Stage SOFTENER

Water passes through superior Ion Plus CA-10 Resin for increased efficiency and performance enhancement.

3rd Stage CLARIFIER

This removes all cloudiness resulting in crystal clear water.

4th Stage POLISHER

Water is filtered through a high quality quartz media to polish the water, providing the best quality water.

VESTA DUAL PLATE WATER CONDITIONER

1st Stage REFINER

In this stage untreated water passes through superior Premium Coconut Shell Carbon media.

2nd Stage SOFTENER

Water passes through superior Ion Plus CA-10 Resin for increased efficiency and performance enhancement.
